UV+COLLAGEN

Explore

a new Concept of Tanning

*Advanced Tanning
without Skin Aging
even at 220 Volts!*

Try the experience of enjoying a new generation tanning experience, with the benefits of LED Collagen Stimulation, while saving electricity.

What is HYBRID LED?

The new HYBRID UV+COLLAGEN Smart Solarium LED technology uses the LED Photobiomodulation Technology with RED light in an innovative way, in combination with UV rays. You will then be able to carry out a COMBO COLLAGEN + TAN treatment.

In this way you will have a HYDRATED TAN, which KEEPS the skin YOUNG, activating only its many BENEFICIAL EFFECTS.

The secret of its effectiveness is in the LED technology, able to penetrate the skin to activate the fibroblasts in an extremely effective way.

Enjoy the Best Tanning and Collagen LED technology, at home or provide it to your customers, keeping electricity bills low.

Offer an Open and Anti-Panic Tanning Experience

*With Indjo, the tan becomes open and **limitless**, eliminating the feeling of claustrophobia. Enjoy the sun all year round in **total freedom and safety**, thanks to the innovative and high quality solution of the Indjo tanning shower. Offer your customers a unique wellness and beauty experience, with the absolute novelty of **open and anti-panic tanning**.*

*The whisper of the sun on
your skin
thanks to the silence*

Thanks to the Turbo Silent turbine fans, Indjo offers a silent and relaxing tanning experience.

No noisy motors or annoying fans: just silence and absolute relaxation.

Enjoy the tan without limits and without noise, in total tranquility of your mind and body.

Discover the magic of the sun with Indjo, the silent tanning experience that will surprise you every time.

We Dedicated Our Energies To Bring You The Next Generation Of Tanning

We believe that technology is a means to a better future

At Smart Technologies we have a clear idea of what Technology should be: a means to a better future.

This is why we put our effort into research and offer our users and customers the best technology we could make.

Wireless charger

*Charge your wireless phone
by placing it on the solarium*

Voice Assistant

*Talk to your machine and
ask what you want*

Electronic Check

*Electronic control
integrated security*

Vocal Synt

*Your machine talks to you
and suggests what to do*

Eco

*Optimization of consump-
tion for environmental re-
spect*

UV Commander Touch

The most advanced touchscreen interface can be found on a tanning device. Easy to use, yet powerful and with an attractive design, they make the device easy to use and easy to maintain thanks to the automatic control of the machine status.

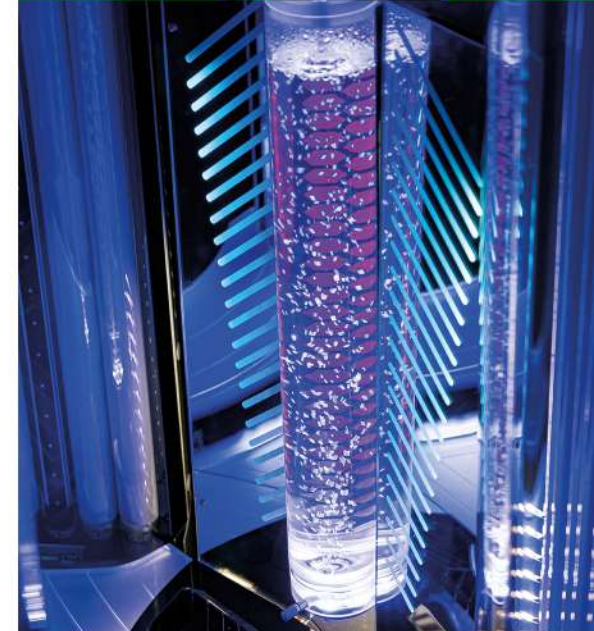

Acqua Breezer Technology with Hyaluronic Acid

A fresh session full of comfort, thanks to the Breezer technology that nebulises water, for sessions without heat and a better tan. But that's not all, we have also added hyaluronic acid to increase skin softness and look better after a session.

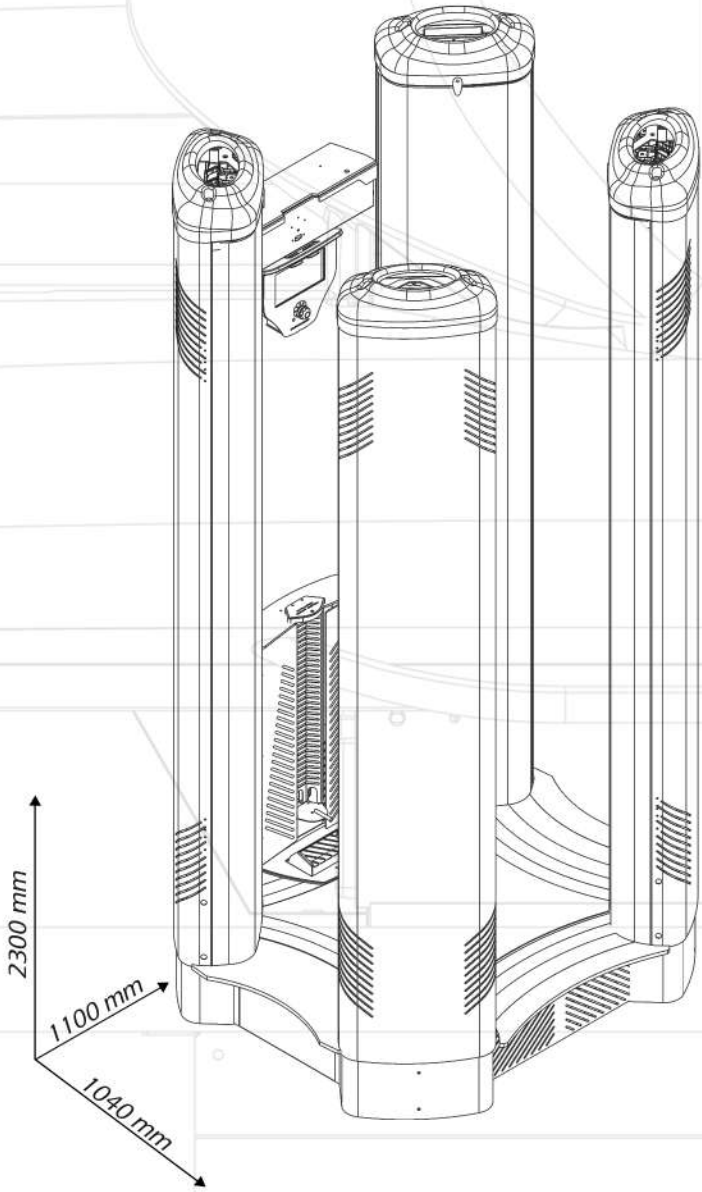

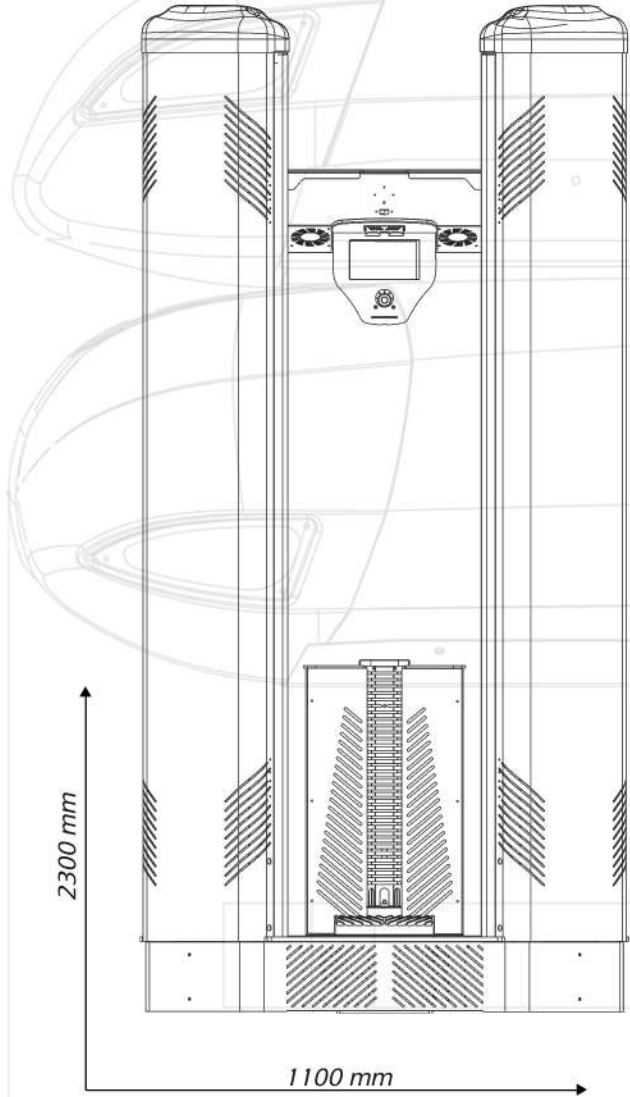

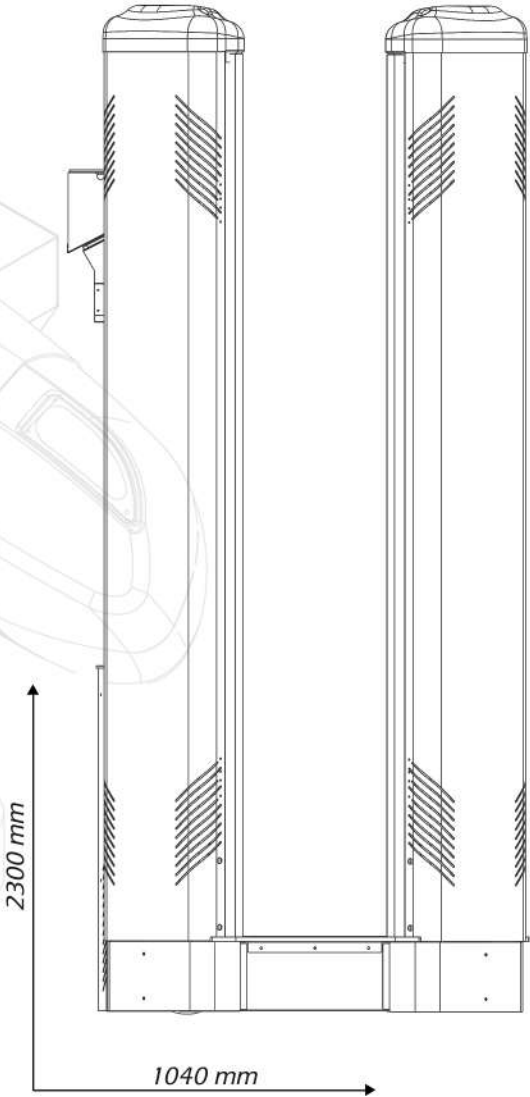

Wireless Sun 4.0

Connect the solarium to the Internet and check the parameters of your machine remotely with the webapp, from PC, tablet or smartphone, every aspect in real time. You can turn it on, change the times and see how much time is left until the next maintenance. You will also have teliagnostica directly from the factory.
